

HP and Assuria Limited

Assuria Auditor

Protection from the insider threat—configuration assurance, vulnerability assessment, change detection and compliance reporting

Threat protection

Assuria solutions help protect against internal and external threats by maximizing the effectiveness of internal security controls and protection systems. They protect organizations and their executives from the risks associated with failure to comply with international regulatory standards.

Automated server scanning

Assuria solutions automate the scanning, testing and managing of compliance for critical business systems to standards such as ISO27001, PCI DSS and SOX. These solutions help to optimize the security configuration of business servers and constantly monitor those systems for unauthorized changes to system configurations or for suspicious events, looking for unauthorized tampering with security controls or information assets. For organizations in financial services, telecoms, Internet, retail, pharmaceutical and government, Assuria Auditor provides a critical element of their IT security infrastructure.

Solution benefits

- Regulatory standards compliance including ISO 27001, PCI DSS and SOX
- Change detection including changes to executables, data files, users and groups
- Detects potential vulnerabilities, assessment of risk from threats
- Powerful and flexible reporting, designed for both technical staff and managers
- Fully scalable from one to 1000s of servers

Working together with HP

As a member of the HP Developer & Solution Partner Program (DSPP), we are able to leverage the sales, marketing and technical resources of HP to create unique solutions across the broad spectrum of HP platforms and operating systems. With access to leading-edge technologies and services, we can meet a wide range of business needs with advanced solutions, developed and delivered quickly, optimized for reliable performance using the most advanced HP technologies.

Proven solution

Assuria Auditor is deployed by hundreds of major enterprises in more than 45 countries worldwide to provide vital information assurance and protection for critical business servers.

For organizations in financial services, telecoms, Internet, retail, pharmaceutical and government, Assuria Auditor provides a critical element of their IT security infrastructure.

Assuria Auditor is a market leader in countering the “insider threat” to business integrity and a key solution for managing compliance to international regulatory standards such as ISO27001.

Through a flexible, distributed management framework, Assuria Auditor measures, manages and enforces server security policies and configurations using a host-to-network view of critical systems and servers, assessing host security, detecting and reporting system security weaknesses, and recommending corrections.

System administrators and network management systems can also be alerted to unauthorized changes to configurations, critical system elements and application components.

HP products supported

Our solutions are supported on a range of HP PA-RISC and HP Itanium®-based systems for powerful UNIX®-based computing. From single-processor servers to the 128-way HP Superdome server, these enterprise servers deliver world-class computing with outstanding performance, innovation and flexibility. With HP, it's easy to choose the ideal platform to exploit the scalability, reliability, availability, serviceability and management of the HP-UX operating environment.

Operating systems supported

Our solutions are optimized for the HP-UX 11i platform, a powerful, agile operating environment delivering mature and stable UNIX capabilities with the highest levels of quality. This robust, secure and highly available platform provides industry-leading virtualization capabilities, intelligent management and broad support of industry standards—enabling you to reduce cost and complexity, adapt in real time to business needs, and unlock the full value of IT assets.

Service and support

Working with HP Services, we provide you with a complete portfolio of services tailored to your unique business and IT needs. We leverage the proven methodologies and expertise of over 65,000 HP Services professionals around the world to help your company design, build, integrate, manage and evolve an infrastructure that lets you respond to business changes easily and cost-effectively.

Building on the value of strong relationships

By working with HP, we have the resources, experience and knowledge of an industry leader to ensure our solution delivers the business results and value your company requires. HP is a company that thrives on innovation, with a proven track record of success in virtually every market, customer segment and region worldwide. Together, we have the technology and services to meet your most demanding needs.

HP and Assuria have worked together for many years helping customers respond to ever increasing security threats. HP-UX was one of Assuria's first supported platform. In addition, Assuria Auditor is used by HP consultants in several parts of the world as a key tool for server hardening and configuration security reviews.

Working together to drive success

By combining standards-based and modular technologies with our leading-edge applications and a full portfolio of services, you gain a powerful, flexible solution that meets your business needs today—and adapts dynamically as those needs change. That's the foundation for building an agile, responsive enterprise to drive better business outcomes for your long term success.
